

EUROMATE DFI

EFFECTIVE INDUSTRIAL AIR CLEANING

Euromate DFI: Versatile, cost-efficient & flexible

The Euromate DFI air cleaner is the ideal choice for sectors such as logistics, manufacturing and woodworking. Improve air quality for healthier employees, increased productivity, a better corporate image through less dusty products and lower operating costs.

Lightweight design

Its low weight ensures minimal load on the roof structure. This makes the DFI easy to install in any operating environment, especially in situations where solar panels may challenge roof loads.

Smart IoT Solution

The online Air Safety Portal allows you to effortlessly monitor the performance of the DFI, adjust settings, and manage the system remotely. With the optional AirCheq sensors, you also gain real-time insight into your air quality and can take advantage of dust-controlled operation.

Modular design

The air cleaners are modular and scalable, so they can always be deployed at the right capacity. This results in a cost-effective and efficient air cleaning solution that is flexible and can grow with your business operations.

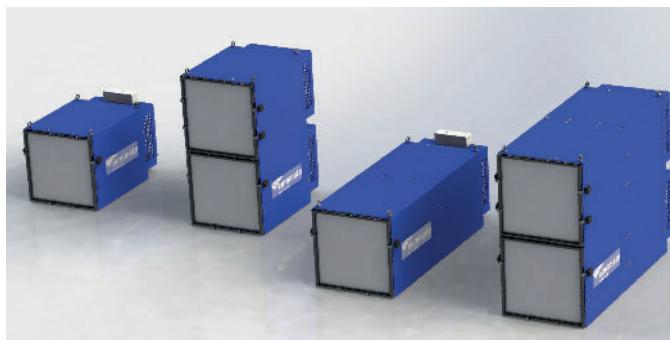

Energy savings

The DFI operates on the basis of recirculation, providing higher comfort at equal energy costs. Moreover, you can save energy with the optional dust-controlled regulation.

Technical data

| Air cleaner | Weight | Measurements |
|-------------|--------|----------------------|
| DFI 30 | 42 kg | 560 x 560 x 1015 mm |
| DFI 60 | 82 kg | 560 x 1120 x 1015 mm |
| DFI 30 DF | 60 kg | 560 x 560 x 1650 mm |
| DFI 60 DF | 112 kg | 560 x 1120 x 1650 mm |

No sprinkler adjustments

The Euromate DFI is a safe choice. Thanks to its compact dimensions, the system also suffices in environments where the sprinkler system is already installed and therefore no costly modifications need to be made.

Flexible configuration for every environment

Thanks to the various models and filter packages, the air cleaners can be effortlessly adapted to the different sources of pollution within your company. This results in a solution that perfectly aligns with your specific air quality objectives.

Plug & Play

The DFI is immediately ready for use, no cutting or breaking is required and only one power point is sufficient. After installation, you will immediately experience the benefits of this advanced air cleaning application.
